Q: Virtual environment only works on host machine I am working on django website on macOS. I have a project and a virtual environment. I am able to work on my project on the terminal, but when I try to create the virtual environment I get: (venv) username@Macbook:/Users/user/Desktop/myProject\$ virtualenv venv (venv) username@Macbook:/Users/user/Desktop/myProject\$ source venv/bin/activate (venv) username@Macbook:/Users/user/Desktop/myProject\$ python Traceback (most recent call last): File "/Library/Frameworks/Python.framework/Versions/3.5/bin/python", line 5, in from pkg_resources import load_entry_point File "/System/Library/Frameworks/Python.framework/Versions/3.5/lib/python3.5/site-packages/pkg_resources/__init__.py", line 30, in from pkg_resources import ExtensionFileFinder, build_ext, get_build_ext File "/System/Library/Frameworks/Python.framework/Versions/3.5/lib/python3.5/site-packages/pkg_resources/__init__.py", line 41, in from util import subst_dict ImportError: No module named util
